A sustainable, global energy transition requires reinventing our energy industry. Where are the new business areas of the subsurface sector? What are their visions? What know-how does the geothermal, hydrogen storage, CCS and E&P subsurface industry need? We open the stage for the energy players. What are your questions to the industry?

We are happy to announce our speakers:

- **Maïke Dupont**, Manager Stakeholder Relations, Uniper Energy Storage GmbH
- **Ole Engels**, Director – Energy Transition, Reservoir Technical Services, Baker Hughes
- **Peter Michael Holzapfel**, Senior Consultant Hydrogen Market, Siemens AG
- **Lisl Lewis**, Business Development / Geophysicist, GeothermEx Consulting Services
- **Tobias Rudolph**, Professor for Geomonitoring in old and Post-mining Areas, Technische Hochschule Georg Agricola

Panel discussion moderated by:

Gesa Netzeband, Managing Director, DGMK
